ACTIVESMART™ SPECIAL FEATURES

Variable temperature zones

The serving temperature of your wine is crucial for your taste and enjoyment, therefore 'Wine Modes' have been carefully designed to both care for your wine and provide the ideal serving temperature for all wine varieties.

The separate modes allow you to adjust the temperature in both compartments independently.

Not all wines will improve over time. Check with your wine merchant for more information regarding the best storage conditions for your wine.

WINE MODES		TYPES OF WINE TO STORE
Red (16°C/61°F)	'Red Mode' is suitable for short term storage of light, fruity and full-bodied reds at serving temperature.	Pinot Noir, Merlot, Malbec, Shiraz/Syrah, Chianti, Cabernet Sauvignon, Vintage Port.
Cellar (12°C/54°F)	For longer term storage of all wine varieties, 'Cellar Mode' provides conditions suitable for aging wines.	All varieties.
White (8°C/46°F)	'White Mode' is suitable for short term storage of aromatic white wines and Rose at serving temperature.	Sauvignon Blanc, Chardonnay, Riesling, Pinot Gris, Viognier, Chablis, Gewürztraminer, Rosé.
Sparkling (7°C/45°F)	'Sparkling Mode' is suitable for short term storage of all sparkling wines at serving temperature.	Sparkling wines (eg Méthode Champenoise, Metodo Classico) Champagne, Cava, Prosecco.

Light modes

Four Light Modes are available to choose from. Select a Light Mode that suits the desired illumination of bottles as well as the surrounding environment.

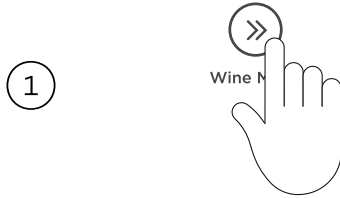

WINE MODES	
Off	Select "Off" to turn off all compartment lights.
Low	The dimmest setting available; softly illuminating the interior of your Integrated Wine Cabinet while allowing it to blend into the surrounding environment.
Display	Brightly illuminates bottles on the display rack while all other racks remain dimly lit, bringing emphasis to those extra special bottles.
High	Turns all compartment lights to full brightness; the perfect mode for showcasing your wine collection.

USING YOUR APPLIANCE

Temperature control

At initial startup, each **WINE MODE** will automatically default to the recommended temperature setting. Once you have selected the compartment and required **WINE MODE**, the temperature can be adjusted as desired. The selected setting will be saved for future use.

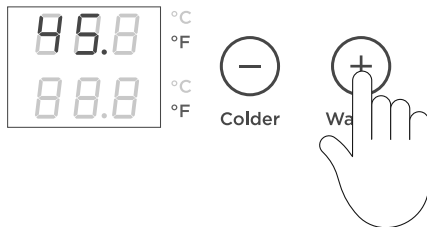

» Selecting the Wine Mode

Select the desired compartment.

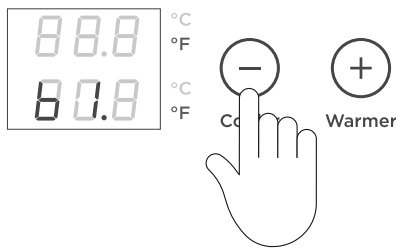

Press » to scroll through the available modes. The light next to the name of the **WINE MODE** will illuminate as you scroll to indicate which mode is selected.

Adjusting the temperature

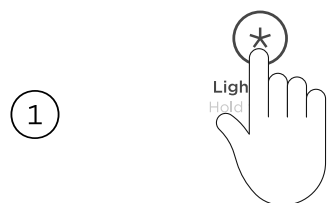

Press + to increase the temperature of the selected food mode.

Press - to decrease the temperature of the selected food mode.

USING YOUR APPLIANCE

★ Selecting the Light Mode

To activate a Light Mode:

Press ★ repeatedly to scroll through the available **LIGHT MODE** settings and select your preferred mode.

Press ★ for two seconds to activate.

A blinking light indicates the current position when scrolling through the list.

To deactivate a Light Mode:

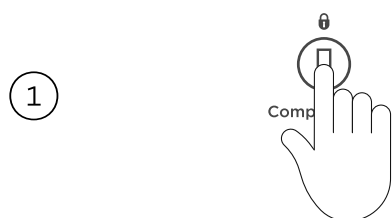

Press ★ for two seconds to deactivate.

When opening the door of your product, all internal lights will illuminate to full brightness. Upon closing the door, your appliance will remember the previously selected **LIGHT MODE**

Note: 'Display' and 'High' modes will default to 'Low' after a set duration. For longer term storage, we recommend turning your lights to **OFF**.

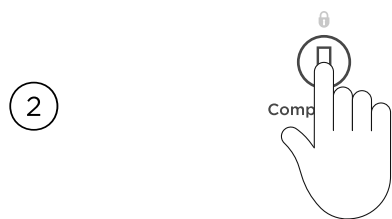

🔒 Key lock

Allows you to disable the buttons on the control panel. Suitable when cleaning your appliance.

To activate:

Press □ for two seconds. The 🔒 icon on the control panel will illuminate.

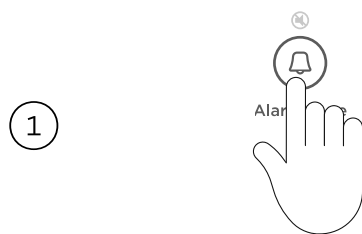

To deactivate:

Press □ for two seconds. The 🔒 icon will dim.

USING YOUR APPLIANCE
